MKT power dispenser VM-P Akku

Flexible

Free of power cords and compressed air hoses, the VM-P Akku can also be used easily and quickly outdoors and in places otherwise difficult to access. It is suitable for all MKT injection technologies and for many cartridge sizes.

Reliable

The powerful 18 V motor safeguards reliable dispensing of injection mortar, also at low cartridge temperatures and with mixer extensions.

Productive

The dispensing speed can be adjusted infinitely within optional limits for precise metering. The repeat function stores and dispenses any number of times the filling quantity dispensed last.
