

Wedge Anchor BZ-IG

Steel, zinc plated

Range of Loading: 2,0 kN - 18,5 kN

Range of concrete quality: C20/25 - C50/60

Description

The fastening system BZ-IG is the first approved (ETA-99/0010) wedge anchor for cracked concrete with internal thread. It combines the benefits of a mechanical anchor with an easy installation and the flexibility of an internal thread. For the first time it is possible to fasten balcony and stair railings or stadium seats using a countersunk head screw at favourable costs. Since this anchor system is also approved for use with hexagon head screws and standard threaded rods a wide range of applications is possible. Compared to a drop in anchor the fastening system BZ-IG can carry significant higher loads, even in cracked concrete. The versatility of the MKT Fastening System BZ-IG breaks new ground in design and application.

Applications:

Medium to heavy duty fastenings in cracked and non-cracked concrete: Railings, suspended ceilings, ladders, doors, sprinkler systems, pipe hangers and all kinds of temporary fastenings.

Pre-Installation

Wedge Anchor BZ-IG¹⁾

- Steel, zinc plated; Pre-Installation
- Approved for cracked and non-cracked concrete

Description	Ref. No.	Drill hole	Anchor length	Thread	Pkg. content.	Weight per pkg.
		Ø x depth		Ø x length		
		mm	mm	mm	pcs.	kg
BZ-IG M 6-0	03600101	8 x 60	50	M6x20	100	1,42
